

NAME OF ULB – SULTANPUR

Water Supply

1. Assess the Service Level Gap

The first step is to assess the existing situation and service levels gaps for Water Supply (AMRUT Guidelines; para 3 & 6). This will also include existing institutional framework for the sector. AMRUT is focused on improvement in service levels. The zone wise data shall be used in identifying the gaps. These zone-wise gaps will be added to arrive at city level service gaps. While assessing service level gap reply following questions not more than word indicated against each question.

Question: What kind of baseline information is available for water supply system of the city? Detail out the data, information, plans, reports etc related to sector. Is zone wise information available? (75 words)

Water supply status report is available with U.P.JalNigam, Sultanpur. The status report consists of existing water supply system with reference to water supply production, and distribution of water supply lines. In that DPR city has divided into 5 zones.

Question: Have you collected census 2011 data? Are you aware of baseline survey data of MoUD? Have you correlated data from these and other sources? (75 words)

Yes. Data of census 2011 is available with Nagar Palika Parishad Sultanpur and the source is NIC. Nagar Palika Parishad Sultanpur is aware of MOUD survey data. The data available is being used as reference to develop the slip.

	Location of source of drinking water Population	Total Number of Households	Tapwater from treated source
Total Population (Census, 2011)	Population- 107914		
	Total	17783	11471
	Within the premises	14670	10740
	Near the premises	2343	545
	Away	770	186
Departmental Data (2015)	Population-120000	21471	11327

*As per the existing data of ULB

What are existing service levels for water supply in the city? What is the coverage of water supply Connections? What is per capita supply of water? How much is the extent of metering? How much is non-revenue water? Provide information in table

Table: Status of Water Supply service levels

Sr. No.	Indicators	Present Status	MOUD Benchmark	Reliability
1	Coverage of water supply connections (11327/21471)	52.75%	100%	D
2	Per capita supply of water (17MLD/0.120)	141LPCD	135 LPCD	D
3	Extent of metering of water connections	0%	100%	A
4	Extent of non-revenue water	40%	20%	D
5	Quality of water supplied	90%	100%	D
6	Cost recovery in water supply services	25 %	100%	D
7	Efficiency in collection of water supply related charges	50%	90%	D

Question: What is the gap in these service levels with regard to benchmarks prescribed by MoUD? (75 words)

1. Coverage of water supply connections gap is 47.25%
2. Per capita supply of water gap is 0 LPCD
3. Extent of metering of water connections gap is 100%
4. Extent of non-revenue water gap is 20%
5. Quality of water supplied gap 10%
6. Cost recovery in water supply services gap is 75%
7. Efficiency in collection of water supply related charges gap is 40%

SOURCE OF WATER AND WATER TREATMENT SYSTEM.

Please provide information in 150 words on the above responding to (however not limited to) following questions.

Question: What is the existing source of water? Is it surface water source or under ground water source? What is the capacity of these sources?

Existing source of water is underground water, total no of tub well is 17. Capacity of these sources is 17 Tub well X 1 MLD= 17 MLD

Question: Is there any treatment provided to water from these sources? How much water is required to be treated daily? What is the treatment capacity installed in the city?

Underground water chlorination is being done. Treatment capacity of ground water is 17 MLD.

Question: What per capita water supply in LPCD (liter per capita per day) comes out, if you divide total water supply by the total population.?

Source of water Capacity 17 MLD and Per Capita of Water Supply is = $17 \text{ MLD} / 0.120 = 141.66 \text{ LPCD}$ with NRW

DISTRIBUTION ZONES

Please provide information in 150 words on the above responding to (however not limited to) following questions.

Question: City is divided in how many zones for water supply ?

There are 5 zones for water supply in Nagar Palika Parishad Sultanpur.

Table: Zone Wise Coverage of Households

Question: Provide details of total no of Households (HH) in each zone, no of HH with and without water tap connections in the Table

Zone No.	Total No. of Households	Households with Water tap Connection	Households without Water tap Connection
1A	7232 HH	4230HH	3002HH
1B	7360HH	4197HH	3163HH
2A	3002HH	1600HH	1402HH
2B	2721HH	1300HH	1421HH
3	1156HH	0HH	1156HH
Total	21471HH	11327HH	10144HH

As per the departmental data total number of household is 21471 and as per the census total household is 17783 in this above statement as per departmental data 11327 HH without tap connection and as per census 11471 HH without tap water connection

STORAGE OF WATER

Please provide information in 25 words on the above responding to (however not limited to) following questions.

Question: What is the total water storage capacity in the city? What is capacity of elevated and ground water reservoirs?

In Nagar Palika Parishad Sultanpur water production is 17 MLD and 1 elevated reservoirs and the storage capacity is 2.25 ML.

Question: In case of surface water, does city need to have ground level reservoirs to store raw treated water?

Not apply in Nagar Palika Parishad Sultanpur.

Question: Is water being supplied to consumers through direct pumping or through elevated reservoirs?

In Nagar Palika Parishad Sultanpur water is being supplied to consumers through direct pumping as well as elevated reservoirs.

Question: Is storage capacity sufficient to meet the cities demand?

No storage capacity is sufficient to meet the city demand. In Nagar Palika Parishad Sultanpur water production is 17 MLD and storage capacity is 2.25 ML. Total city storage capacity demand is $17 \text{ MLD} / 3 = 5.66 \text{ ML}$ but availability is 2.25 ML Storage Capacity Gap is $(5.66 \text{ ML} - 2.25 \text{ ML} = 3.41 \text{ ML})$.

DISTRIBUTION NETWORK

Please provide information in 150 words on the above responding to (however not limited to) following questions.

Question: What is the total length of water supply distribution pipe line laid in the city?

The total length of water supply distribution pipe line is 107 KM.

Question: What is the total road length in the city? Is the pipe lines are laid in all streets? Is the objective of universal coverage of water supply pipe line is achieved?

The total road length is 147 KM Pipe lines are not laid in 40 KM and universal coverage of water supply is not achieved.

Question: What are the kind of pipe materials used in distribution lines?

PVC, DI, CI and GI pipe materials used in distribution lines.

Question: Provide zone wise details of street length with and without water distribution lines in the Table?

Table: Zone Wise length of distribution network

Zone No.	Total Street Length	Street length with water distribution pipe line	Street length without water distribution pipe line
1A	28 KM	22 KM	6 KM
1B	42 KM	37 KM	5 KM
2A	24 KM	16 KM	8 KM
2B	28 KM	20 KM	9 KM
3	25 KM	12 KM	13 KM
Total	147 KM	107 KM	40 KM

Sultanpur reorganization water supply scheme survey was carried out in 2009 and scheme was sanctioned in 2013. In this estimate old pipe line about 70 km which was laid in 1963-64 and completed their serviceable life and proposed to be replace by new pipeline. As per 2009 survey total pipe line proposed in DPR was 107 Km. A new survey carried out in 2015 and total road length comes out 147 Km. In 2011 as per census survey out of 17783 HH only 717 HH is away from source. From 2011 to 2015 new House constructed in outer part of city and in 2015 total house hold is about 21471. At present total $(21471-17783=3688*0.8=2950)$ $2950+717=3667$ HH are away from source. To provide source near 3667 HH about 40 Km pipe line needed.

INSTITUTIONAL FRAMEWORK

Please provide information in 150 words on the above responding to (however not limited to) following questions.

Question: Define role and responsibilities in terms of O&M, policy planning, funding, service provision in table

Table: Functions, roles, and responsibilities

Planning and Design	Construction/ Implementation	O&M

Planning and Design	Construction/ Implementation	O&M
UP JAL NIGAM SULTANPUR	JAL NIGAM SULTANPUR	N.P.P. SULTANPUR ON CONTRACT BASE

Question: How city is planning to execute projects?

The execution of the projects will be done as per instructions given by the state government as well as MOUD & smaller projects like branch lines, gaps in pipe lines will be done by Nagar Palika Parishad Sultanpur and nodal agency Jal Nigam Sultanpur.

Question: Shall the implementation of project be done by Municipal Corporation or any parastatal body? Please refer para 8.1 of AMRUT guidelines.

Implementation of the project shall be done by Nagar Palika Parishad Sultanpur as well as State Level Parastatal Agency U.P. Jal Nigam. Nagar Palika Parishad Sultanpur will follow the para 8.1 of the AMRUT Guidelines while execution of the project.

2. Bridge the Gap

Once the gap between the existing Service Levels is computed, based on initiatives undertaken in different ongoing programs and projects, objectives will be developed to bridge the gaps to achieve universal coverage. (AMRUT Guidelines; para 6.2 & 6.3, Annexure-2; Table 2.1). Each of the identified objectives will be evolved from the outcome of assessment and meeting the opportunity to bridge the gap.

Question: List out initiatives undertaken in different ongoing programs and projects to address these gaps. For this provide details of ongoing projects being carried out for sector under different schemes with status and when the existing projects are scheduled to be completed? Provide information in Table

Table: Status of Ongoing/ Sanctioned

S. No	Name of Project	Scheme Name	Cost	Month of Compilation	Status (as on dd mm 2015)
1	UIDSSMT	Sultanpur Water Supply Reorganization Schem. Tub well- New 05 Rebore-11, OHT-04, CWR -02 Distribution System -107 Rising main -11.8 KM, Staff Quarters -02	33.92 Cr	Dec, 2015	50 % March 2016

Question: How much the existing system will be able to address the existing gap in water supply system? Will completion of above will improve the coverage of network and collection efficiency? If yes, how much. (100 words)

Yes in this above said project address the existing gap in terms of Coverage of water supply, per capita of water supply, pressure and water production.

Question: Does the city require additional infrastructure to improve the services? What kind of services will be required to fulfill the gap?

Yes. City required additional work like regularization of unregistered connections, and to motivate citizens to take connection will increase coverage and reduction of NRW, Improve Quality of Water as well as metering will improve efficiency of collection and operation.

Question: How does the city visualize taking the challenge to rejuvenate the projects by changing their orientation, away from expensive asset replacement programs, to focusing on optimum use of existing assets?

Nagar Palika Parishad Sultanpur will make its people aware of the importance of drinking water. Nagar palika Parishad Sultanpur will make efforts by meetings & registering water connections by advertisements.

Question: Has city conducted assessment of Non Revenue Water? If yes, what is the NRW level? Is city planning to reduce NRW?

City has not conducted any assessment related to NRW Nagar Palika Parishad Sultanpur have approximate NRW level is 40%

Question: Based on assessment of existing infrastructure and ongoing / sanctioned projects, calculate existing gaps and estimated demand by 2021 for water supply pipe network, number of household to be provided with tap connections, and required enhancement in capacity of water source/ treatment plant (MLD). Gaps in water supply service levels be provided as per Table

Component	2015			2021	
	Present	Ongoing	Total	Demand	Gap
Source	17 MLD	5 MLD	22 MLD	16.75 MLD	0
Treatment capacity	17MLD	-	17 MLD	16.75 MLD	0

Component	2015			2021	
	Present	Ongoing	Total	Demand	Gap
Elevated Storage capacity	2.25ML	3.35 ML	5.60ML	5.58 ML	0
Distribution network coverage	70 KM	70 KM Replace and 37 KM New	107 Km	147 Km	40Km

OBJECTIVES

PBased on above, objectives will be developed to bridge the gaps to achieve universal coverage. While developing objectives following question shall be responded so as to arrive at appropriate objective.

Please provide List out objectives to meet the gap in not more than 100 words.

Question: Does each identified objectives will be evolved from the outcome of assessment?

- **Universal Coverage by Regularizing of 1798 Household and laying of pipe line 40 KM in uncovered area**
- **Reduction of NRW by Leakage Detection**
- **Improve the quality of Water through establishment of Lab and implementation of online water testing and Monitoring System**
- **Efficiency of charges collection-. Metering system in water supply system and online billing, tracking system & spot billing machine.**

Question: Does each objective meet the opportunity to bridge the gap?

YES,

3. Examine Alternatives and Estimate Cost

The objective will lead to explore and examine viable alternatives options available to address these gaps.. These will include out of box approaches. (AMRUT Guidelines; Para 6.4 & 6.8 & 6.9). This will also include review of smart solutions. The cost estimate with broad source of funding will be explored for each. While identifying the possible activities, also examine the ongoing scheme and its solutions including status of completion, coverage and improvement in O&M. Please provide information on the above responding to (however not limited to) following questions.

Question: What are the possible activities and source of funding for meeting out the objectives? (75 words)

The funding for meeting out the each objective will 50% from AMRUT and remaining 50% from state and Nagar palika Parishad Sultanpur.

Question: How can the activities be converged with other programme like JICA/ ADB funded projects in the city etc? (100 words)

There are no ongoing project under JICA/ADB but activities is converged with UIDSSMT

Question: What are the options of completing the ongoing activities? (75 words)

In this above ongoing project is incomplete and need of money for completion of the project.

Question: How to address the bottlenecks in the existing project and lessons learnt during implementation of these projects? (75 words)

In Nagar Palika Parishad Sultanpur there is a staff shortage for running the project and focusing toward enhancement of coverage. During the implementation of water supply scheme awareness among public was most challenging activities.

Question: What measures may be adopted to recover the O&M costs? (100 words)

Nagar Palika Parishad Sultanpur will minimize non-revenue water by regularizing unregistered water connections & make more efforts from collection staff & introducing metering system & automation of tube wells.

Question: Will metering system for billing introduced?

Yes. Nagar Palika Parishad Sultanpur will introduce metering system for billing under AMRUT scheme.

Question: Whether reduction in O&M cost by addressing NRW levels be applied? (75 words)

By regularizing of water connection through IEC activities, Introduce metering of water connections, improve the collection efficiency.

Question: Does each objective meet the opportunity to bridge the gap?

YES.

THE ALTERNATIVE ACTIVITIES TO MEET THESE ACTIVITIES BE DEFINED AS PER TABLE

Table: Alternative Activities To Meet Objectives

Sr. No.	Objective	Activities	Cost (Cr)	Financing Source
1	Ongoing Project	Tub well- 05,OHT-04, CWR -02 Distribution System -107 Rising main -11.8 KM, Staff Quarters -02	16.84 Cr	AMRUT/State and ULBs
1	To achieve the universal coverage	To universal coverage by regularizing – 1798 HH 1798HH X3086Rs	0.555 Cr	AMRUT/State and ULBs
		Laying of Pipe line in uncovered areas 40KM X 0.25Cr	10 Cr	AMRUT/State and ULBs
2	To make the system efficient by reduction of NRW water	Household Level Metering 21471HH X3000 Rs	6.44 Cr	AMRUT/State and ULBs
3	To improve the quality of water	Establishment/rehab of water testing lab and implementation of online water testing & monitoring systems and water testing van	0.50 Cr	AMRUT/State and ULBs
4	Efficiency of charges collection	Metering system in water supply system, and online billing, tracking system & spot billing machine	0.25 Cr	AMRUT/State and ULBs
	Total		34.585	

4. Citizen Engagement

ULBs will organize and conduct city level citizen consultation and receive feedback on the suggested alternatives and innovations. Each alternative will be discussed with citizens and activities to be taken up will be prioritized to meet the service level gaps. ULB will prioritize these activities and their scaling up based on the available resources. (AMRUT Guidelines; Para 6.6, 6.7 & 7.2). Please explain following questions in not more than 200 words detailing out the needs, aspirations and wishes of the local people.

Question: Has all stakeholders involved in the consultation?

Nagar Palika Parishad Sultanpur passes the proposals which are put up by ward members. Thus all stakeholders involve in the consultations on 11/08/2015

Question: Has ward/ zone level consultations held in the city?

In Nagar Palika Parishad Sultanpur ward/zone level consultations has held under the chairmanship of ward members on 20/09/2015 &16/10/2015.

Question: Has alternative proposed above are crowd sourced?

Yes. Suggestions and views of the crowd are taken into consideration on website www.Sultanpur.nic.in

Question: What is feedback on the suggested alternatives and innovations?

90% of the people are agreed to regularization of connection and improvement of quality of water supply & metering of water connections.

Question: Has alternative taken up for discussions are prioritized on the basis of consultations?

Yes.

Question: What methodology adopted for prioritizing the alternatives?

After the consultation made in Nagar Palika Parishad Sultanpur board meetings as the discussion regularization of water connections ,laying of pipe lines, metering of water connections, establishment of Lab .

5. Prioritize Projects

Based on the citizen engagement, ULB will prioritize these activities and their scaling up based on the available resources to meet the respective objectives. While prioritizing projects, please reply following questions in not more than 200 words.

Question: What are sources of funds?

The source of funding of activities shall be: 1. AMRUT, 2. 14th Finance Commission 3. State Government Funds

Question: Has projects been converged with other program and schemes?

There is no other scheme running in the city.

Question: Has projects been prioritized based on “more with less” approach?

Yes the projects are being prioritized based on “more with less” approach universal coverage through IEC activities.

Question: Has the universal coverage approach indicated in AMRUT guidelines followed for prioritization of activities?

YES

6. Conditionalities

Describe in not more than 300 words the Conditionalities of each project in terms of availability of land, environmental obligation and clearances, required NOC, financial commitment, approval and permission needed to implement the project.

**Public awareness to increase the coverage of water supply, Augmentation of water supply system
No need of Land, environment clearance and NOC for meet the GAP for universal coverage and
quality of water.**

7. Resilience

Required approvals will be sought from ULBs and competent authority and resilience factor would be built in to ensure environmentally sustainable water supply scheme. Describe in not more than 300 words regarding resilience built in the proposals.

Disaster and environmental related factor will be considered while preparation of DPRs

8. Financial Plan

Once the activities are finalized and prioritized after consultations, investments both in terms of capital cost and O&M cost has to be estimated. (AMRUT Guidelines; para 6.5) Based on the investment requirements, different sources of finance have to be identified. Financial Plan for the complete life cycle of the prioritized development will be prepared. (AMRUT Guidelines; para 4, 6.6, 6.12, 6.13 & 6.14). The financial plan will include percentage share of different stakeholders (Centre, State and City) including financial convergence with various ongoing projects. While preparing finance plan please reply following questions in not more than 250 words

Question: How the proposed finance plan is structured for transforming and creating infrastructure projects?

As per the guidelines of the AMRUT, the structured plan of the project will be developed. The share of State and ULB will be decided in High power committee.

Question: list of individual projects which is being financed by various stakeholders?

There is no such individual project.

Question: Has financial plan prepared for identified projects based on financial convergence and consultation with funding partners?

Yes, financial plan prepared for identified projects are based on financial convergence and consultation with funding partners. GOI, State and ULB

Question: Is the proposed financial structure is sustainable? If so then whether project has been categorized based on financial considerations ?

Yes, the proposed financial structure is sustainable and project has been categorized based on financial considerations.

Question: Have the financial assumptions been listed out ?

Yes, financial assumptions have been listed out

Question: Does financial plan for the complete life cycle of the prioritized development?

Yes, financial plan has been done for the complete life cycle of the prioritized development

Question: does financial plan include percentage share of different stakeholders (Centre, State, ULBs)

Yes, financial plan include percentage share of different stakeholders (Centre, State and ULB)

Question: Does it include financial convergence with various ongoing projects.

Yes, it includes financial convergence with various ongoing projects

Question: Does it provide year-wise milestones and outcomes ?

Yes, year-wise milestones and outcomes have been provided.

DETAILS IN FINANCIAL PLAN SHALL BE PROVIDED AS PER TABLE 8.1, 8.2, 8.3, 8.4 AND 8.5. THESE TABLES ARE BASED ON AMRUT GUIDELINES TABLES 2.1, 2.2, 2.3.1, 2.3.2, AND 2.5.

Table 8.1 Master Plan of Water Supply Projects for Mission period
(As per Table 2.1of AMRUT guidelines)

(Amount in Rs. Cr)

S. No.	Objective	Project Name	Priority number	Year in which to be implemented	Year in which to be completed	Estimated Cost Cr
1.	Ongoing Project	Sultanpur Water Supply Reorganization Scheme.	1			16.84
2.	To achieve the universal	To universal coverage by regularizing – 1798 HH 1798HH X3086Rs	2	2016	2018	0.555 Cr
